# 7-XP/2™
for the IBM Personal System/2

DX10 on the IBM PS/2 . . .
. . . now run with 7 users

The 7-XP/2 is a convenient, simple way to run your DX10 applications on an IBM PS/2 or clone.

The 7-XP/2 consists of one card, software, and terminal breakout box. The ease of installation and portability of DX10 applications are the key features of the 7-XP/2.

Virtually all programs written in BASIC, COBOL, PASCAL, Assembler, etc. for the DX10 operating system will run on the 7-XP/2 without relinking, recompiling, or modification.

Performance Solutions are Ten X's Business.
